

## Special Issue

# Gynecologic Oncology – Old Controversies and New Strategies

### Message from the Guest Editor

The field of gynecologic oncology has experienced some impressive developments over the last few years. The already established surgical treatment of ovarian or cervical cancer has been questioned and partly changed. The inferiority of laparoscopic radical hysterectomy in the LACC study led to one of the most controversial discussions in recent years. Radical lymph node dissection was not shown to improve survival in advanced ovarian cancer. Sentinel lymph node dissection became standard in vulvar cancer. Therefore, we ask ourselves: Which of our therapeutical strategies are really based on reliable evidence? How can we improve the implementation of novel surgical techniques without delaying invention? Do these large randomized controlled trials really answer the intended questions? What role will surgical oncology play in the future? We urgently need larger randomized controlled trials. However, we also need to analyze real-world data and retrospective cohorts to generate new hypotheses which can then be specifically addressed in large prospective studies. The goal of this Special Issue is to present new hypotheses and new results regarding surgical gynecological oncology.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Antoni Torres

1. Institut D investigacions August Pi I Sunyer (IDIBAPS), Department of Pulmonology, Hospital Clinic de Barcelona, Universidad de Barcelona, 08036 Barcelona, Spain

2. Centro de Investigación Biomédica en Red en Enfermedades Respiratorias (CIBERES), Instituto de Salud Carlos III, 28029 Madrid, Spain

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed, PMC, MEDLINE, CAPus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
