Deadline for manuscript  
submissions:

**closed (20 December 2020)**

### Message from the Guest Editors

This Special Issue of *Membranes* welcomes works related to the topic of organic solvent nanofiltration membranes. The scope of this Special Issue will cover (but is not limited to) materials and synthesis methods for making these membranes (all materials and types are welcome, including polymer, ceramic, mixed matrix/hybrid), characterization and analysis of these membranes, and their applications in various fields. We welcome and encourage the submission of original research articles, reviews, industrial cases, and short communications on recent advances in the wider area of organic solvent nanofiltration membranes.

### Keywords

- Organic solvent nanofiltration
- Membrane technology
- Process integration
- Membrane development
- Solvent recovery
- Industrial applications

### Prof. Dr. Spas D. Kolev

School of Chemistry, The  
University of Melbourne,  
Melbourne, VIC 3010, Australia

## Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

*Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
