Membranes in Biomedical Engineering: Assisting Clinical Engineers

Guest Editors:

Prof. Dr. Kiyotaka Sakai

Professor Emeritus of Chemical Engineering, Waseda University, 3-4-1 Okubo, Shinjuku, Tokyo 169-8555, Japan

Prof. Dr. Makoto Fukuda

Department of Biomedical Engineering, Kindai University, 930 Nishimitani, Kinokawa, Wakayama 649-6493, Japan

Dr. Hiroyuki Sugaya

Clean Energy Materials Research Laboratory, Advanced Materials Research Laboratories, Toray Industries, Inc. 2-1, Sonoyama 3-chome, Otsu, Siga 520-0842, Japan

Message from the Guest Editors

In this Special Issue, researchers are invited to contribute original research papers, as well as review articles or short communications, related to the preparation and characterization of membranes, transport phenomena, antithrombotic material, fouling, biocompatibility, module and reactor design, process design, and industrial perspectives.

The topics include but are not limited to extracorporeal membrane oxygenation (ECMO), gas separation membrane, artificial organs (artificial kidney, dialyzer, artificial liver, artificial pancreas), bioartificial organs (bioartificial kidney, bioartificial liver, bioartificial pancreas, cell culture, scaffold), blood purification membranes, tissue engineering, and regenerative medicine in biomedical engineering.

Deadline for manuscript submissions:

closed (31 March 2022)

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Spas D. Kolev

School of Chemistry, The
University of Melbourne,
Melbourne, VIC 3010, Australia

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375).

Membranes is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Physical*) / CiteScore - Q2 (*Chemical Engineering (miscellaneous)*)
