Special Issue

Recent Advances in Biomembrane Models for Studying Interactions with Bio-/Molecules

Message from the Guest Editors

This Special Issue aims to investigate all types of bioactive compound–membrane interactions. We are pleased to invite you to submit your original research articles and reviews. Research areas may include (but are not limited to) the following topics relating to interactions of bioactive compounds:

- cellular membranes, and their influence on membrane structure, function, biomolecular organization and dynamics, fluidity, and composition,
- model membranes (eg. liposomes, phospholipid bilayers, Langmuir monolayers),
- membrane proteins (eg. COX, P-gp),
- membrane traffic, receptors, and channels.

Both molecular modeling and simulation as well as various biophysical (e.g., differential scanning calorimetry, fluorescence spectroscopy, infrared spectroscopy, circular dichroism, patch clamp) and biological techniques can be used as research methods. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open accessjournal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev School of Chemistry, The University of Melbourne, Melbourne, VIC 3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
