

Special Issue

Novel Polymeric Fibrous Membrane Materials: Synthesis, Modification and Application

Message from the Guest Editors

We are pleased to invite you to submit your latest results (research articles and reviews) in the Special Issue on "*Novel Polymeric Fibrous Membrane Materials: Synthesis, Modification and Application*" of the journal *Membranes*. This Special Issue aims to seek contributions to assess the state of the art and future developments in the field of cellulose membranes. The relevant topics include (but are not limited to) the following: the designation of the cellulose membrane structure, novel methods of cellulose membrane preparation, the modification of the cellulose membrane, and new applications of cellulose membranes.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
