

Special Issue

Applications of Membrane Filtration and Separation

Message from the Guest Editors

This Special Issue, entitled "Applications of Membrane Filtration and Separation", is dedicated to advancing the science and technology of membrane filtration and separation by exploring key aspects such as microfiltration, ultrafiltration, membrane technology, filtration process design, and innovative applications. This Special Issue examines the performance of membrane filtration and separation under various operational conditions, offering insights into filtrate rate, solute rejection, power consumption, and utilization. It also addresses challenges related to filtration fouling, proposing strategies to mitigate membrane fouling and enhance filtration performance. Additionally, this Special Issue explores membrane fabrication and modification, emphasizing the role of membrane technologies in transportation, preparation, characterization, and other applications. Authors are invited to submit their latest research findings on innovative studies and industrial applications of membrane filtration and separation. Both original research papers and review articles are welcome.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
