Special Issue

Recent Advances in Polymeric Membranes—Preparation and Applications (2nd Edition)

Message from the Guest Editors

Following the success of "Recent Advances in Polymeric Membranes—Preparation and Applications" (https://www.mdpi.com/journal/membranes/special_iss ues/OVXE047BK8), we are pleased to announce the launch of the second edition of this Special Issue. Over the years, polymeric membrane technology has received significant attention due to its advantages, such as ease of operation, energy saving capability, compact size, environmental friendliness, and multiple applications. Polymeric membranes can be prepared using varied techniques and with several configurations depending on their applications. The development of new polymeric materials and their growing number of applications demands the development of better-suited membranes with different characteristics or new composite membranes and methods of preparation, as well as new funtionalization methods. This Special Issue will highlight the most recent and applicable achievements in the preparation, modification, and performance of polymeric membranes for water treatment, energy saving and/or energy storage, gas separation, and biomedical applications.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open accessjournal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev School of Chemistry, The University of Melbourne, Melbourne, VIC 3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
