

Special Issue

Inorganic Membranes for Energy and Environmental Applications

Message from the Guest Editors

We are pleased to invite you to this Special Issue, “Inorganic Membranes for Energy and Environmental Applications”, to promote membrane technologies based on a variety of inorganic materials. Energy and environmental issues have been recognized as significant challenges for sustainable development, and inorganic membranes offer great opportunities for efficiently addressing related problems in the field, particularly for applications under harsh conditions. This Special Issue aims to report recent advances in inorganic membranes for energy and environmental applications, covering both fundamental and industrial perspectives. Original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Membrane preparation (zeolite, silica, carbon, metallic, metal oxide, etc.);
- Membrane applications (gas separation, liquid separation, ion separation, fuel cell, chemical production, etc.);
- Membrane process development;
- Modeling and simulation.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
