

## Special Issue

# Application of Membrane Materials in Bioseparation and Downstream Processing

### Message from the Guest Editors

In this Special Issue, authors are invited to submit original articles and reviews on the application of membrane materials in bioseparation and downstream processes. The contributions may concern (i) the development of new membrane materials with applications in bioseparation and downstream processes; (ii) the characterization of existing or new membrane materials with applications in bioseparation and downstream processes; (iii) the development of membrane materials for bioseparation and downstream processes; (iv) process optimization and scaling up to utilize membrane materials for bioseparation and downstream processes; (v) the mechanistic study of utilizing membrane materials for bioseparation and downstream processes; (vi) the modelling of utilizing membrane materials for bioseparation and downstream processes; (vii) the application of membrane materials to bioanalytics.

### Guest Editors

Dr. Wei Zhang

Downstream Processing Group, Bioprocessing Technology Institute, Agency for Science, Technology and Research (A\*STAR), Singapore 138668, Singapore

Prof. Dr. Lingxue Kong

Institute for Frontier Materials, Deakin University, Waurn Ponds, VIC 3216, Australia

### Deadline for manuscript submissions

10 November 2025

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Spas D. Kolev  
School of Chemistry, The University of Melbourne, Melbourne, VIC  
3010, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
