

## Special Issue

# Biomolecular Interactions with Cell and Model Membranes: Integrating Biophysical Experiments and Computational Simulations

### Message from the Guest Editors

This Special Issue aims to collect original research and review articles that explore biomolecular interactions with biological and model membranes, such as cell membranes, micelles, monolayers, lipid bilayers, and liposomes (SUVs, LUVs, MLVs, GUVs), using a wide array of biophysical and computational methodologies. We especially encourage submissions employing techniques such as electron paramagnetic resonance (EPR), solution-state and solid-state nuclear magnetic resonance (NMR), circular dichroism (CD), steady-state and time-resolved fluorescence spectroscopy, Fourier-transform infrared spectroscopy (FTIR), differential scanning calorimetry (DSC), isothermal titration calorimetry (ITC), dynamic light scattering (DLS), Langmuir monolayers, atomic force microscopy (AFM), small-angle X-ray scattering (SAXS), and molecular dynamics (MD) simulations. Studies that integrate multiple experimental and/or computational approaches to reveal the structural, thermodynamic, or dynamic aspects of membrane-associated phenomena are of particular interest.

### Guest Editors

Dr. Luis Guilherme Mansor Basso

Physical Sciences Laboratory, State University of Northern Rio de Janeiro, Campos dos Goytacazes 28013-602, Rio de Janeiro, Brazil

Prof. Dr. Antônio José da Costa Filho

Departamento de Física, Faculdade de Filosofia Ciências e Letras de Ribeirão Preto, Universidade de São Paulo, Ribeirão Preto, Brazil

### Deadline for manuscript submissions

10 November 2025

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Spas D. Kolev  
School of Chemistry, The University of Melbourne, Melbourne, VIC  
3010, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
