

# Special Issue

## CO<sub>2</sub> Capture and Fixation

### Message from the Guest Editor

It is my pleasure to invite you all to contribute to this Special Issue dealing with advances in the capture of CO<sub>2</sub>, both from atmosphere and specific processes. However, capture would mean nothing without fixation of the compound in any possible chemical form, from carbonates to organic molecules, and for this reason, in this issue, we would like to connect these two topics.

### Guest Editor

Prof. Dr. Ricard Garcia-Valls

Departament de Enginyeria Química, Universitat Rovira i Virgili, 43007 Tarragona, Spain

### Deadline for manuscript submissions

closed (15 May 2020)

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
