

## Special Issue

# Progress in Extracellular Vesicle (EV) Analysis

### Message from the Guest Editor

EVs represent a heterogeneous group of membrane surrounded structures with various sizes and origins. They play a significant role in a broad range of physiological and pathological processes, such as cell-to-cell signaling, antigen presentation, and immunomodulatory activities. EVs participate in various diseases, and their diagnostic and therapeutic exploitation potential is under intense investigation. However, their size and amount often make them difficult to obtain as relatively pure preparations and to characterize them properly. Accordingly, analysis of EVs' morphology, composition, biogenesis, and function is one of the topics of interest in EV research. This Special Issue aims to contribute to advancing the current and frontier developments in the field of EV analysis. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: mechanism of EV production, characteristics of EV membranes and internal molecules, novel applications in EV analysis, etc.

### Guest Editor

Dr. Krisztina Vukman

Department of Genetics, Cell- and Immunobiology, Semmelweis University, H-1089 Budapest, Hungary

### Deadline for manuscript submissions

closed (10 October 2022)

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Spas D. Kolev  
School of Chemistry, The University of Melbourne, Melbourne, VIC  
3010, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
