Special Issue

Electrochemical Membrane and Membrane Processes

Message from the Guest Editor

This Special Issue aims to gather the recent developments on: (i) ion exchange membranes for energy conversion processes like water electrolyzer; (ii) ion conduction membranes used in redox flow batteries for energy storage processes; (iii) designing and fabrication of membrane electrode assemblies (MEAs) for electrochemical reactions; and (iv) novel methods and tools for membrane characterization in electrochemical devices. The formats of research may include (but are not limited to) the following: original articles, reviews, mini-reviews, communications, comparative perspectives, and opinions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open accessjournal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC 3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
