

Special Issue

Advanced Membrane Technologies for Wastewater Treatment and Recycling

Message from the Guest Editors

We are pleased to invite you to submit your latest results (research article and reviews) in the Special Issue on “Advanced Membrane Technologies for Wastewater Treatment and Recycling” of the journal *Membranes*. This Special Issue aims to seek contributions to assess the state of the art and future developments in the field of membrane technologies in wastewater treatment and recycling. Topics include (but not limited to) the following: membrane bioreactor applications, membrane fouling mechanisms, membrane fouling control, membrane fabrication and modification, fouling characterization, and various wastewater treatments. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
