

Special Issue

Eco-Friendly Membrane Materials and Technology

Message from the Guest Editors

The Special Issue, "Eco-Friendly Membrane Materials and Technology", seeks contributions in the field of environmental and natural membrane technology containing the most recent scientific and technological advances. Original research articles or reviews are welcome, and submissions to this Special Issue will address (but are not limited to) the following themes:

- Biodegradable membrane for energy storage devices.
- Natural membrane fabrication and characterizations.
- Engineering eco-friendly membranes and innovative environmental technologies.
- Bio-based membrane employment in solar cell.
- The optimization of eco-friendly membranes for managing air and water pollution.

We look forward to receiving your manuscripts.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
