

Special Issue

Advanced Polymeric Membranes for Fuel Cell Applications

Message from the Guest Editors

In this Special Issue, we are seeking high-quality original research or review papers on "**Advanced Polymeric Membranes for Fuel Cell Applications**". This Special Issue will emphasize the following topics of interest, including but not limited to:

- New materials for membrane development for fuel cells;
- Advances in the fabrication of fuel cell membranes;
- Direct methanol fuel cells;
- Hydrogen fuel cells;
- Direct borohydride fuel cells.

We look forward to receiving your contributions.

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
