

Special Issue

Biocompatible Membranes for Bone Regeneration

Message from the Guest Editors

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not be limited to) the following:

- Nanoassembly and layer-by-layer nanotechnologies for membrane materials;
- Characterization and analysis of membrane structure and function;
- Ceramic membranes, metallic membranes, membranes from carbon-based materials;
- Natural/synthetic polymeric membranes;
- Nanostructured membranes;
- 3D-printed biocompatible membranes for tissue regeneration;
- Nanoparticle-loaded membranes for bone regeneration;
- Membranes for guided bone regeneration;
- Resorbable/non-resorbable membranes.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC
3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
