

Special Issue

Biological, Biomimetic, and Biomedical Applications of Membranes

Message from the Guest Editor

The aim with this Special Issue is to deliver new insights in the recent advances in membrane applications within biology, biotechnology, biomimetics, and biomedical areas. We look forward to receive submissions describing original research or focused reviews related to design, materials, synthesis methods, and process developments.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.
