

## Special Issue

# Ceramic Membranes for Wastewater and Water Reuse

### Message from the Guest Editor

This Special Issue on “Ceramic Membranes for Wastewater and Water Reuse” of the journal *Membranes* aims to collect original, high-quality articles that explore the potential of ceramic membranes for a wide range of applications related to various domestic/industrial wastewater and water reuse technologies. Topics include but are not limited to new materials and modifications, water and wastewater treatment, water reuse technologies, membrane fouling and cleaning, and industrial application. Authors are invited to submit their latest results; both original papers and reviews are welcome. **Keywords:**

- ceramic
- membrane
- water reuse
- wastewater
- industrial
- material

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Spas D. Kolev  
School of Chemistry, The University of Melbourne, Melbourne, VIC  
3010, Australia

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
