

## Special Issue

# Fouling in Liquid Separation Membrane Technologies

### Message from the Guest Editors

This Special Issue encourages the submission of general works on membrane fouling, and, in particular:

- Case studies on membrane systems characterized by a constant or sudden permeate flux reduction as a function of time
- Review of historical process data from membrane systems that exhibit a reduction of performances as a function of time due to fouling
- Studies of fouling formation and growth on membrane surfaces
- Development of statistic and/or mathematical models of the ongoing fouling on membrane systems as a function of time
- Critical flux, threshold flux, sustainable flux, boundary flux studies
- Advanced control systems for membrane processes for fouling formation inhibition
- Membrane surface modification studies to inhibit fouling formation
- Biofouling
- Development of new devices, equipment, modules or process design for fouling inhibition purposes
- Cleaning and/or washing procedures to eliminate fouling formation on membranes

I hope that you might join this opportunity for publication of your work.

---

### Guest Editors

Dr. Marco Stoller

Department of Chemical Engineering, University Sapienza of Rome, Via Eudossiana 18, Rome, Italy

Dr. Javier Miguel Ochando-Pulido

Department of Chemical Engineering, University of Granada, 18071 Granada, Spain

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Spas D. Kolev  
School of Chemistry, The University of Melbourne, Melbourne, VIC  
3010, Australia

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
