Special Issue

Advanced Membranes for Fuel Cells and Redox Flow Batteries

Message from the Guest Editors

This Special Issue, “Advanced Membranes for Fuel Cells and Redox Flow Batteries”, will be a perfect forum to bring together the latest results obtained by key laboratories focused on membranes and membrane materials with applications in related research and development, including the synthesis, characterization, and applications of membranes. **Potential topics include, but are not limited to:**

- Fuel cells;
- Redox flow batteries;
- Proton-exchange membranes;
- Cation-exchange membranes;
- Anion-exchange membranes;
- Porous membranes;
- Amphoteric membranes.

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open accessjournal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC 3010, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
