

Special Issue

Advanced Membrane Processes in Water Treatment

Message from the Guest Editors

This Special Issue on “Membrane Processes in Water Treatment” of the journal *Membranes* seeks contributions to assess the state-of-the-art and future developments in the field of membrane processes for water treatment. Topics include, but are not limited to, pressure/ osmotically/thermally-driven membrane processes for freshwater and process water production as well as wastewater treatment. Novel membrane materials and applications (including hybrid processes) as well as industrial case studies are also considered. Authors are invited to submit their latest results; both original papers and reviews are welcome. **Keywords**

- Drinking water
- Process water
- Wastewater
- Membrane processes

About the Journal

Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Spas D. Kolev
School of Chemistry, The University of Melbourne, Melbourne, VIC

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
