

## Special Issue

# Characterization and Roles of Membrane Lipids

### Message from the Guest Editors

This Special Issue will present research studies on lipids, investigating aspects related to biology, medicine, nutriology, pharmacology, toxicology, environmental science, methodology, analytical chemistry, and corresponding applications. Authors are invited to submit their latest original research papers or review articles. **Keywords:**

- Lipid profiling
- Lipid analysis
- Lipid metabolism
- Structure–function relationship
- Lipid effects
- Lipid assembly
- Lipid interaction
- Lipid behavior
- Membrane dynamics
- Interfacial reaction

### Guest Editors

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
