

# Special Issue

## Polymeric Membrane

### Message from the Guest Editor

This Special Issue "Polymeric Membrane" is particularly focused on the concerns associated with membranes and catalysts with special properties and efficiencies that are applied in the construction of energy devices. It is for researchers and technologists interested in all aspects of the science, technology, and applications of sources of electrochemical power, syntheses of polymers to obtain membranes for gas separation, and hydrogels with excellent oxygen permeability, among others. Both original research articles and reviews about the science and applications of gases, proton, and ions for electrochemical cells are welcomed. Topics considered include the research, development, and applications of materials and novel componentry for these kinds of devices.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to contribute a research article or a comprehensive review for consideration and publication in *Membranes* (ISSN 2077-0375). *Membranes* is an international, peer-reviewed open access journal of membrane technology published monthly online by MDPI. The journal covers the broad aspects of the science and technology of both biological and non-biological membranes, including membrane dynamics and the preparation and characterization of membranes and their applications in water, environment, energy, and food industries. Articles contributing to better understanding of transport processes in all types of membranes are also welcome. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Polymer Science) / CiteScore - Q1 (Chemical Engineering (miscellaneous))
