

Special Issue

Organizational and Safety Climate: Research and Interventions

Message from the Guest Editors

In recent years, the debate around the relationship between organizational climate and the safety climate has become increasingly heated. From an organizational perspective, organizational climate has been defined as the employees' shared perceptions of and the meaning attached to the policies, practices, and procedures experienced within an organization. Safety climate, instead, has been defined as a "particular type of organizational climate that could differentiate between low and high accident rate companies". Following the most recent research, safety climate is now considered a subtype of organizational climate; in more detail, literature has now focused on the idea that organizations have several climates. In view of this, this Special Issue invites the submission of high-quality conceptual and empirical papers from different perspectives on research and interventions in organizational and safety climate.

About the Journal

Message from the Editor-in-Chief

People at work is the focus of *Merits—Journal of Human Resources*, an international, peer-reviewed open access journal. We focus on contemporary research issues related to enabling people at work to thrive. *Merits—Journal of Human Resources* recognizes the importance of investing in human performance, so includes the exploration of talent development modalities and frameworks, people analytics, and issues related to coaching and mentoring. We invite your contribution to the field.

Editor-in-Chief

Prof. Dr. Gabriela Topa
Department of Social and Organizational Psychology, The National
Distance Education University, 28015 Madrid, Spain
