Advances in Food Sciences: Metabolomics to Unravel the Complexity of Food Metabolites

Guest Editor:

Dr. José Iván Serrano-Contreras

Department of Metabolism,
Digestion and Reproduction,
Section of Nutrition, Faculty of
Medicine, Commonwealth
Building, Hammersmith Campus,
Imperial College London, London
W12 0NN, UK

Message from the Guest Editor

This Special Issue welcomes clinical and non-clinical studies using metabolomics approach to unveil new compounds from food, and if possible, their biological effects. Hyphenated mass spectrometry (MS) and nuclear magnetic resonance spectroscopy (NMR) are the analytical platforms to be considered. Regarding MS, this Special Issue will focus on chromatography (e.g., gas chromatography (GC), liquid chromatography (LC), or ion chromatography (IC)) or capillary electrophoresis (CE) hyphenated with MS.

Deadline for manuscript
submissions:

30 September 2024

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
