## Exploring and Expanding Horizons in Secondary Metabolites: Biosynthesis, Identification, Regulation and Biological Activity

Guest Editors:

**Dr. Alberto Jorge Oliveira  
Lopes**

Graduate Program in Chemistry,  
Federal Institute of Education,  
Science, and Technology of  
Maranhão, São Luis 65030-005,  
MA, Brazil

**Dr. Antônio Cantanhede Filho**

Laboratório de Extração e  
Cromatografia, Instituto Federal  
de Educação, Ciência e  
Tecnologia do Maranhão,  
Campus Monte Castelo, São Luís  
65030-005, MA, Brazil

**Dr. Cláudia Quintino Da Rocha**

Laboratory of Chemistry of  
Natural Products, Department of  
Chemistry, Federal University of  
Maranhão, São Luís 65080-805,  
Brazil

### Message from the Guest Editors

Dear Colleagues,

The exploration of secondary metabolites is a leading area of scientific research, covering topics from plant defense to therapeutic and biotechnological uses. This Special Issue of *Metabolites*, titled "Exploring and Expanding Horizons in Secondary Metabolites: Biosynthesis, Identification, Regulation and Biological Activity", aims to expand the study focus to the chemical variety present in microorganisms, marine organisms, and animals.

This Special Issue aims to encourage interdisciplinary discussions on secondary metabolite research in plants, microbial sciences, marine biology, and animal studies to reveal universal principles and potential applications of these metabolites. It also aims to advance basic science and facilitate new applications in health, agriculture, and environmental sustainability by compiling cutting-edge research on the biosynthesis, identification, regulation, and biological activity of secondary metabolites.

Deadline for manuscript  
submissions:

**15 July 2024**

## Editor-in-Chief

### Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy  
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPUS / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry & Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
