Sciences, Texas State University,
601 University Drive, San Marcos,
TX 78666, USA

Dr. Carmen Reynolds

Mayo Clinic, 200 First Street SW,
Rochester, MN 55905, USA

Message from the Guest Editors

This Special Issue aims to solicit original research papers, review articles, and meta-analyses that focus on topics that cover dietary strategies targeted toward vitamin D metabolism and their implications for health and chronic disease prevention (e.g., obesity, cardiovascular diseases, type 2 diabetes, chronic inflammatory diseases), in both preclinical and clinical phases.

We hope that the information generated from this Special Issue will identify dietary strategies for the optimization of vitamin D status, which may serve as approaches to prevent and attenuate disease progression, and to elucidate the regulatory role of vitamin D in health and disease.

an Open Access Journal by MDPI

Editor-in-Chief

Dr. Amedeo Lonardo

1. Formerly Director of the Simple Operating Unit "Metabolic Syndrome", Azienda Ospedaliero-Universitaria, 41126 Modena, Italy
2. Formerly Professor of Internal Medicine, School of Specialization of Allergology and Clinical Immunology, University of Modena and Reggio Emilia, 41121 Modena, Italy

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
