Deadline for manuscript  
submissions:

**closed (31 July 2017)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on experimental and computational advances in the analysis of metabolic flux; modelling of metabolite regulation of protein activity and expression; metabolic processes analysis and modelling; quantitative metabolomics application in metabolism modelling; computational modelling of metabolic networks; computational analysis of the effects of genetic and nutritional modification on cell metabolism and growth. Our goal is to combine in one issue diverse examples of the application of modelling in the analysis of metabolic processes, pathways and networks, as well as their regulation.

Dr. Miroslava Cuperlovic-Culf

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)
