### Message from the Guest Editor

Dear Colleagues,

This Special Issue will mainly consist of selected papers presented at the 4th Metabolomics Workshop (<http://bioanalysis.web.auth.gr/metabolomics/>). Papers applying metabolomics in life and plant/food/nutrition sciences are also welcomed on this special issue, selected examples include, but are not limited to:

- Human growth, healthy ageing biomarker discovery
- Disease biomarkers: diagnostic/prognostic, patient stratification
- Food authenticity/geographical origin verification
- Investigation of gut microbiota host-guest interactions

## Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Biochemistry and Molecular Biology*) / CiteScore - Q2 (*Endocrinology, Diabetes and Metabolism*)
