

Special Issue

Metabolic Syndrome and Non-Alcoholic Liver Disease

Message from the Guest Editors

This Special Issue aims to provide a platform for researchers to present their latest findings and insights in the field of metabolic syndrome and non-alcoholic liver disease (NAFLD). The focus of this Special Issue is to explore the complex interplay between metabolic syndrome and NAFLD, shedding light on its underlying mechanisms, clinical implications, and potential therapeutic strategies. Potential authors are invited to contribute original research articles, reviews, and commentaries that delve into the intricate links between metabolic syndrome and NAFLD, as well as propose innovative approaches for addressing these significant health challenges. We welcome submissions that offer new perspectives, present compelling data, and contribute to advancing the field's understanding of metabolic syndrome and NAFLD. Through this Special Issue, we aim to encourage dialogue, share best practices, and pave the way for improved clinical outcomes in these interconnected domains.

Guest Editors

Prof. Dr. Mircea-Catalin Fortofoiu

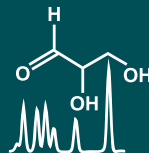

Internal Medicine Department, University of Medicine and Pharmacy of Craiova, Filantropia Hospital of Craiova, 200143 Craiova, Romania

Dr. Luigi Boccuto

School of Nursing, Healthcare Genetics Program, Clemson University, Clemson, SC 29646, USA

Deadline for manuscript submissions

closed (30 April 2025)

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
