

Special Issue

Metabolomics of Human Nutrition: The Dot of Human Nutrition and the Circle of Soil, Plants, Animals and Microbes in Relation to It, 2nd Edition

Message from the Guest Editor

This Special Issue of *Metabolites* is dedicated to exploring the metabolomics of human nutrition in health and disease, as well as its intricate connections to soil science, botany with crop science, zoology with animal husbandry, and the diverse microbial ecosystems of the biosphere. While various hypotheses exist regarding the interplay between the metabolic processes within the human body (micro-cosmos) and those in the broader biosphere (macro-cosmos), a comprehensive and systematic knowledge base on this subject is still lacking.

To bridge this gap, this Special Issue aims to leverage metabolomics both as an independent analytical approach and within the broader omics framework. The metabolome offers a highly integrative and dynamic perspective on human nutrition, providing the basis for in-depth analyses and systemic syntheses that encompass both key disciplinary insights and interdisciplinary linkages.

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
