

Special Issue

Editorial Board Members' Collection Series: Health Environment and Metabolomics

Message from the Guest Editor

Human health and the environment are closely linked. Environmental factors have broad and far-reaching effects on human metabolism. Metabolomics is a systemic approach used in studying the composition and metabolic changes in organisms, providing a new perspective for understanding the relationship between human metabolism and health, which is of great theoretical and practical significance. Topics to be covered by this Special Issue include, but are not limited to:

- The impact of health environment on the metabolome;
- Application of metabolomics in environmental pollution and health assessment;
- Application of metabolomics in health regulation and treatment;
- Application of metabolomics technology in environmental health research.

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
