

Special Issue

Glycolipid Metabolism and Health of Aquatic Animals

Message from the Guest Editors

This Special Issue of *Metabolites* aims to publish high-quality original research articles and reviews containing following topics: 1) exploration of the regulatory metabolisms of key regulatory elements and signal pathways; 2) analysis of the cooperation of glucose and the lipid metabolism; 3) revelations regarding the metabolic characteristics of the glycolipid metabolism in different aquatic animals; 4) investigation of the deep mechanisms of the two high-energy diets regarding the ways in which they have detrimental effects to physiology, metabolism and health; 5) explorations of the nutritional regulation strategies for improving the glycolipid metabolism and health under normal conditions or high-energy feeding; 6) creating or using novel detecting and/or data analysis tools to help solve the above five problems.

Guest Editors

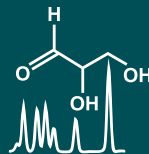

Dr. Mo Peng

Dr. Chaobin Qin

Dr. Sakhawat Hossain

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
