Special Issue

Obesity and Metabolic Syndrome in Children: Insights, Interventions and Emerging Perspectives, 2nd Edition

Message from the Guest Editors

This second edition of the Special Issue "Obesity and Metabolic Syndrome in Children: Insights, Interventions and Emerging Perspectives" is a continuation of the first one. Metabolic syndrome in children represents a nuanced continuum intricately woven by various contributing factors, beginning with fetal programming. The prenatal environment plays a pivotal role in shaping metabolic trajectories, impacting organ development and programming metabolic pathways. The interplay between specific gene variants may contribute to altered lipid metabolism, insulin resistance, and other hallmarks of metabolic syndrome. Increased oxidative stress can disrupt cellular function and contribute to the development of insulin resistance and inflammation. Moreover, environmental risk factors, encompassing lifestyle, dietary habits, and pollutant exposure, further modulate the trajectory of metabolic health in children. Investigating these intricate relationships provides a comprehensive understanding of the origins and progression of metabolic syndrome in pediatric populations, offering valuable insights for targeted interventions and early-life prevention strategies.

Guest Editors

Dr. Teofana Otilia Bizerea-Moga

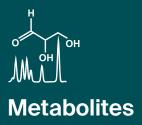

Department XI: Pediatrics, Faculty of Medicine, "Victor Babeş" University of Medicine and Pharmacy, 300041 Timişoara, Romania

Dr. Rade Vukovic

- 1. Department of Pediatric Endocrinology, Mother and Child Health Care Institute of Serbia "Dr Vukan Cupic", 11 070 Belgrade, Serbia
- 2. School of Medicine, University of Belgrade, 11 000 Belgrade, Serbia

Deadline for manuscript submissions

31 December 2025

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
