

Special Issue

Metabolomics: The Role of Natural Products in Drugs

Message from the Guest Editors

In this Special Issue, we aim to highlight recent advances in metabolomics-driven discovery, characterization, and application of natural products in drug development. We welcome the submission of studies that explore innovative analytical strategies; bioactivity-guided metabolomics; in silico metabolite prediction; metabolic pathway engineering; translational research; and the integration of metabolomics with pharmacology, toxicology, or systems biology.

Guest Editors

Dr. Jeysson Sanchez-Suarez

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.6 days after submission; acceptance to publication is undertaken in 3.7 days (median values for papers published in this journal in the first half of 2026).
