

## Special Issue

# Management of Diabetes and Its Metabolic Complications

### Message from the Guest Editor

The global burden of diabetes and its associated metabolic complications continue to grow, representing a paramount clinical and public health challenge.

In this Special Issue, “Management of Diabetes and Its Metabolic Complications”, we aim to curate a comprehensive collection of research that advances our understanding of this multifaceted condition. We seek submissions that delve into the molecular mechanisms linking hyperglycemia and metabolic dysfunction to end-organ damage, as well as translational studies that evaluate novel therapeutic paradigms. Of particular interest is original research on the cardiorenal protective effects of newer drug classes, innovative technologies for monitoring and treatment, precision medicine approaches, and the management of diabetic neuropathy and retinopathy. We also welcome contributions on systemic challenges, such as integrated care models, prevention strategies, and the management of diabetes in the context of obesity and metabolic syndrome.

### Guest Editor

Dr. Aldo Ferreira-Hermosillo

Unidad de Investigación Médica en Enfermedades Endocrinas,  
Hospital de Especialidades, Centro Médico Nacional Siglo XXI,  
Instituto Mexicano del Seguro Social, Mexico City 06720, Mexico

### Deadline for manuscript submissions

12 October 2026

## About the Journal

### Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Endocrinology, Diabetes and Metabolism)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
