

Special Issue

Mitochondrial Metabolism in Health and Disease: A Clinical Perspective

Message from the Guest Editors

In this Special Issue, we aim to collect a sample of the latest research in mitochondrial metabolism. Altogether, the articles published in this collection will reinforce the significance of this organelle in the functioning of the cell and in human diseases. We welcome original research and review manuscripts on any aspects of mitochondrial metabolism, including mitochondrial dynamics, mitochondrial genetics, bioenergetics, the intrinsic pathway of apoptosis, the regulation of calcium levels, and oxidative stress. Studies on mitochondrial dysfunction in human disorders, including cancer and metabolic, cardiac, and neurodegenerative diseases, are also welcome. As the mitochondrion is a common link among these fields, participating researchers may uncover broader implications to their findings.

Guest Editors

Dr. Joao Pessoa
Dr. Ana Duarte
Dr. Susana P. Pereira

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo
Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
