Metabolomics Studies in Ruminant Models: Unraveling Nutritional Physiology and Health

Message from the Guest Editors

This Special Issue focuses on the application of metabolomics in ruminant models to elucidate the intricate relationships between nutrition, physiology, and health. Metabolomics, the comprehensive analysis of metabolites in biological systems, offers a powerful tool to understand how dietary interventions and nutritional status influence metabolic pathways and physiological processes in ruminants. This Special Issue aims to serve as a valuable resource for researchers, veterinarians, and nutritionists seeking to leverage metabolomic insights to enhance ruminant health and well-being. Through the contributions of leading experts and emerging scholars, we strive to unravel the complex interactions between diet, metabolism, and health in ruminant models, ultimately contributing to more sustainable and efficient livestock production systems.

Guest Editors

Prof. Dr. Jože Starič

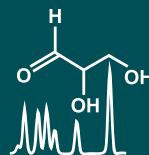

Section for Ruminants, Veterinary Faculty, University of Ljubljana, 1000 Ljubljana, Slovenia

Prof. Dr. Marko R. Cincovic

Department of Veterinary medicine, Faculty of Agriculture, University of Novi Sad, 21000 Novi Sad, Serbia

Deadline for manuscript submissions

28 February 2026

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
