

Special Issue

Metabolism and Diseases

Message from the Guest Editors

The proper control of metabolism is required for essentially every basic biological process. From recent work, it is becoming more evident that many human diseases involve abnormal metabolic states. Altered metabolism at the cellular level contributes to several serious diseases including Alzheimer's disease, obesity, diabetes, and cancer. This awareness leads us to understand the molecular mechanisms that underlie metabolism and its associated pathology. This Special Issue focuses on investigating the connection between metabolic perturbation and diseases, characterizing metabolic disorders, understanding how they compromise tissue function, identifying metabolites that can be potentially used as biomarkers, and designing therapies to restore normal metabolism and improve health.

Guest Editors

Dr. Jiyeon Kim

Department of Biochemistry and Molecular Genetics, University of Illinois at Chicago, Chicago, IL, USA

Dr. Claire Pecqueur

CRCI2NA (Centre de Recherche en Cancérologie et immunologie Intégré- Nantes, Angers), INSERM (Institut National en santé et de la Recherche Médicale), CNRS (Centre National de la Recherche Scientifique), Université de Nantes, 44007 Nantes, France

Deadline for manuscript submissions

closed (28 February 2022)

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
