

Special Issue

Plant Metabolomics III

Message from the Guest Editor

This Special Issue is devoted to publishing research papers on plant metabolomic-related topics. Therefore, we invite manuscripts that employ the metabolomic approach, including but not limited to agricultural applications, plant–pathogen interactions, endophytes, quality control, and related fields. Papers on economically important plants, as well as those that fortify data using a wide array of authentic standards, are especially welcome. The main methods used should be LC-MS, NMR, and GC-MS, with up-to-date quality control and identification methods. Before submission, ensure that your manuscript complies with the following: (1) employs proper annotation of analytes with databases or references; (2) employs quality control assessment via adequate usage of QC samples; (3) provides adequate usage of statistical methods with false positive discovery rates adjusted; and (4) provides enough details regarding the identification of the plant material. Accepted papers will be published continuously in the journal (as soon as accepted) and will be listed together on the Special Issue website.

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
