

Special Issue

Epidemiology, Nutrition and Metabolism, 2nd Edition

Message from the Guest Editors

Studies of diet in relation to human disease raise considerably more complicated methodological challenges than many epidemiological investigations. The specific contributions of nutritional epidemiology include dietary assessment, description of nutritional exposure, and statistical modeling of the diet–disease relationship. In all these areas, considerable progress has been made in recent years, some of which was explored in the previous Special Issue (Volume I). The goal of this special Research Topic is to shed light on the major advances achieved over the past decade in the field of nutritional epidemiology, with a focus on the role of diet in improving human health, and on future challenges to provide a comprehensive overview of the field and identify new avenues of research. Original articles, systematic reviews and reviews that provide additional knowledge on the topic of “Epidemiology, Nutrition and Metabolism” (Volume II) will be welcome.

Guest Editors

Dr. Roberta Zupo

Dr. Maria Lisa Clodoveo

Prof. Dr. Vincenzo Solfrizzi

Dr. Giuseppe Lisco

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
