

## Special Issue

# Metabolomics in the Study of Veterinary Disease

### Message from the Guest Editor

Despite their immense potential, omics technologies—particularly metabolomics—remain underutilised in the study of spontaneous (and to a smaller degree, experimental) animal disease. This Special Issue is designed to focus on studies employing omics approaches in the study of spontaneous and experimental animal disease, as promising tools regarding diagnosis and biomarker discovery, and in uncovering new insights into disease pathophysiology. I would like to invite you to contribute your work to this Issue.

### Guest Editor

Dr. Panos Loukopoulos

Melbourne Veterinary School, Faculty of Veterinary and Agricultural Sciences, 3010 Melbourne, Australia

### Deadline for manuscript submissions

closed (21 July 2022)

## About the Journal

### Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.4 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the first half of 2025).
