

Special Issue

Metabolic and Ecotoxicological Impacts of Chemical Exposures on Aquatic Organisms

Message from the Guest Editors

The forthcoming Special Issue of *Metabolites*, entitled "Metabolic and Ecotoxicological Impacts of Chemical Exposures on Aquatic Organisms", will feature both review articles and original research that delve into the consequences of chemical exposures on aquatic organisms. It will thoroughly investigate the metabolic and ecotoxicological repercussions of these exposures. The research underscores how various chemicals, including pollutants and contaminants, can disrupt the metabolic processes of aquatic organisms, ultimately causing adverse effects on their overall well-being and the ecosystems in which they reside. This Special Issue will provide valuable insights into the challenges presented by chemical contamination in aquatic environments, emphasizing the critical need for more stringent monitoring and conservation efforts to mitigate these impacts.

Guest Editors

Dr. Mauro Eugênio Medina Nunes

Department of Biophysics, Federal University of São Paulo, São Paulo, Brazil

Dr. Talise Ellwanger Muller

Department of Biochemistry and Molecular Biology, Federal University of Santa Maria, Santa Maria, Brazil

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo

Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
