

Special Issue

Metabolomics 2016

Message from the Guest Editor

This Special Issue will mainly consist of selected papers presented at the 4th Metabolomics Workshop (<http://bioanalysis.web.auth.gr/metabolomics/>). Papers applying metabolomics in life and plant/food/nutrition sciences are also welcomed on this special issue, selected examples include, but are not limited to:

- Human growth, healthy ageing biomarker discovery
- Disease biomarkers: diagnostic/prognostic, patient stratification
- Food authenticity/geographical origin verification
- Investigation of gut microbiota host-guest interactions

Guest Editor

About the Journal

Message from the Editor-in-Chief

The metabolome is the result of the combined effects of genetic and environmental influences on metabolic processes. Metabolomic studies can provide a global view of metabolism and thereby improve our understanding of the underlying biology. Advances in metabolomic technologies have shown utility for elucidating mechanisms which underlie fundamental biological processes including disease pathology. *Metabolites* is proud to be part of the development of metabolomics and we look forward to working with many of you to publish high quality metabolomic studies.

Editor-in-Chief

Dr. Amedeo Lonardo
Internal Medicine, Ospedale Civile di Baggiovara, Azienda Ospedaliero-
Universitaria, 41126 Modena, Italy

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q2 (Endocrinology, Diabetes and Metabolism)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.7 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
