Advanced Precision Machining of Metallic Surfaces

Guest Editor:

Dr. Ramanuj Kumar

Machining Research Laboratory (MRL), School of Mechanical Engineering, Kalinga Institute of Industrial Technology (KIIT), Deemed to be University, Bhubaneswar 751024, Odisha, India

Deadline for manuscript submissions: closed (31 August 2023)

Message from the Guest Editor

Dear Colleagues,

Advanced precision machining is a field that encompasses many technologies that have been applied as science has evolved. These developments enable the production of parts with increasing precision in a shorter time. It is based on the use of advanced computerized machine tools that achieve high tolerances and create complex geometric cuts with high repeatability and accuracy. High-precision machining is in great demand in aerospace, medical and automotive-components-making industries to avoid any premature failure during their service life.

In this Special Issue, we welcome articles that focus on advance precision machining techniques such as ultraprecision machining, micro-machining, laser-assisted machining, high-speed machining, hard machining, and any other novel machining techniques. Additionally, articles on surface roughness, surface integrity, machined surface characterization, advanced algorithms, simulations, adaptive control and machine learning techniques to enable precision machining are welcomed.

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. and mechanical behavior. phase transitions microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases. **Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Metals and Alloys)
