Research Laboratory of Scanning Probe Microscopy, Moscow Polytechnic University, B. Semenovskaya St. 38, 107023 Moscow, Russia

Deadline for manuscript submissions: closed (31 March 2023)

Message from the Guest Editor

Dear Colleagues,

High energy ball milling (HEBM) has attracted increasing attention within the various branches of the scientific community. The HEBM of powder mixtures in high-speed planetary ball mills, shakers and other milling equipment allows for the production of nanostructured composites (including reactive ones), solid solutions, metastable phases, pseudoalloys, and various other materials. In the case of metallic systems, high-energy ball treatment induces the formation of multilayered structures, achieving a highly specific surface between the components.

The science of mechanochemistry continues to have multiple blind spots. Therefore, we are calling for papers dedicated to the various aspects of high energy ball milling.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. mechanical behavior. phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases. **Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q1 (*Metals and Alloys*)
