Effect of External Electromagnetic Fields on the Behaviour of Metals and Alloys

Guest Editors:

Prof. Dr. Andreas Chrysanthou
School of Physics, Engineering and Computer Science, University of Hertfordshire, College Lane, Hatfield, Herts AL10 9AB, UK

Prof. Dr. Rongshan Qin
School of Engineering & Innovation, The Open University, Milton Keynes MK7 6AA, UK

Deadline for manuscript submissions:
closed (30 June 2023)

Message from the Guest Editors

In recent years, there has been increasing interest in developing processes based on high external electric or magnetic fields to deliver improved properties to metals and alloys. Much of this research has focused on the application of electromagnetic fields to materials in the solid state. Preference has been given to the use of pulsed fields, as they can minimize energy consumption as well as treatment time. This Special Issue aims to present the latest research concerning the use of external electric and magnetic fields in materials processing. Papers should aim to introduce new knowledge which can allow for progression in this important research topic for both the scientific and technical communities.

This Special Issue is dedicated to the memory of Dr Anatolii Babutskyi, whose contribution to this research topic is widely recognized. His work at the G.S. Pisarenko Institute of Problems of Strength, National Academy of Sciences of Ukraine and at the University of Hertfordshire has motivated young researchers to continue the line of enquiry that he initiated.

Editors-in-Chief

Prof. Dr. Hugo F. Lopez
Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

Prof. Dr. Yong Zhang
Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

Message from the Editorial Board

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure – disciplines in the metallurgical field ranging from processing, mechanical behavior, phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1 (Metals and Alloys)
