# Scientific and Engineering Progress on Aluminum-Based Light-Weight Materials: Research Reports from the German Collaborative Research Center 692

Guest Editor:

### Prof. Dr. Martin F.-X. Wagner

Institute of Materials Science and Engineering, Chair of Materials Science, TU Chemnitz, Germany; Collaborative Research Center 692 – High-strength aluminumbased light-weight materials for safety components, TU Chemnitz, Germany

Deadline for manuscript submissions:

closed (15 December 2017)

# Message from the Guest Editor

Dear Colleagues,

Academia and industry alike are faced with an evergrowing demand for energy-efficiency and reduced weights. Aluminum-based light-weight materials offer great potential for novel engineering applications, particularly when they are optimized to exhibit high strength and yet provide sufficient reliability. The last decade has thus seen substantial activity in the research fields of high-strength aluminum alloys and aluminumbased composite materials. For twelve years, backed by solid funding of the German Research Foundation (Deutsche Forschungsgemeinschaft, DFG), scientists of the Collaborative Research Center; High-strength aluminumbased light-weight materials for safety components (SFB 692) at TU Chemnitz, Germany, have contributed to this research area. In this Special Issue of the well-established Metals journal, we intend to present recent results on highstrength aluminum-based light-weight materials that also provide a broad overview of the research activities in SFB 692 and beyond.

#### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

# **Message from the Editorial Board**

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. and mechanical behavior. phase transitions microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

### **Author Benefits**

**Open Access:** free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy and Metallurgical Engineering*) / CiteScore - Q1

(Metals and Alloys)
