# Additive Manufacturing of Cellular Structures Based on Metal Materials

Guest Editor:

#### Dr. Paweł Baranowski

Military University of Technology, Faculty of Mechanical Engineering, Institute of Mechanics and Computational Engineering, 00-908 Warsaw, Poland

Deadline for manuscript submissions:

closed (31 December 2020)

## **Message from the Guest Editor**

Dear Colleagues,

During the last decade, regular cellular structures have attracted the attention of many scientists because of their specific mechanical properties, including a low mass and high strength. Additionally, the dynamic progress of additive manufacturing technologies provides a possibility to produce complex topologies, which would constitute a challenge to the standard methods. Therefore, the main aim of this Special Issue is to publish scientific papers covering the recent problems related to the additive manufacturing of 2D and 3D regular cellular structures using metal materials, including the following:

- mechanical behavior in terms of energy-absorption and crashworthiness capabilities;
- experimental testing under quasi-static and dynamic conditions;
- numerical modelling and simulation coupled with experimental tests;
- microscopic studies of additively manufactured materials;
- fracture and damage under low and high strain rates

Hopefully, the presented Special Issue will receive many excellent papers covering the key aspects of experimental tests, material studies, and the numerical modelling and simulations of regular cellular structures.

### **Editors-in-Chief**

#### Prof. Dr. Hugo F. Lopez

Department of Materials Science and Engineering, College of Engineering & Applied Science, University of Wisconsin-Milwaukee, 3200 N. Cramer Street, Milwaukee, WI 53211, USA

#### Prof. Dr. Yong Zhang

Beijing Advanced Innovation Center of Materials Genome Engineering, State Key Laboratory for Advanced Metals and Materials, University of Science and Technology Beijing, 30 Xueyuan Road, Beijing 100083, China

# **Message from the Editorial Board**

Metallic materials play a vital role in the economic life of modern societies; contributions are sought on fresh developments that enhance our understanding of the fundamental aspects related to the relationships between processing, properties and microstructure - disciplines in metallurgical field the ranging from processing. mechanical behavior. phase transitions and microstructural evolution, nanostructures, as well as unique metallic properties – inspire general and scholarly interest among the scientific community.

#### **Author Benefits**

**Open Access:** free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science),

Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Metallurgy & Metallurgical Engineering) / CiteScore - Q1 (Metals

and Alloys)
